

Ladies and Gentlemen, and fellow Republicans of Park County

My name is Jason Gemmer, my wife and I live and have raised our 3 children in Park County for over 20 years, thus giving us deep connections and loyalty to our County. I have over 20 years of sitting on various boards and volunteering my time to the Park County Fair Board, Park County Livestock Committee, being a 4-H Leader and sports coach, working with youth to develop respectable and productive members of society. My children and my wife also actively take roles in our community in their own ways, volunteering their time and helping raise our small herd of cattle.

I have 30 years of experience in the construction and municipal industry. Working on bids, estimates, budgetary items and understanding the hidden charges within. My career encompasses involvement for nearly three decades in various industries, including: hydroelectric power plant, micro fossil fuel power plant construction, major fire site restoration, commercial & municipal construction, and residential development. I have managed several departments, section heads and individuals in my carrier.

I have been a voting republican and have shown to be a firm conservative in our county for nearly 28 years. My interest in the Park County Commissioner position is not as a person interested in a career in politics. Alternatively, I am interested in Republican values such as smaller government and not having our government overreach into our personal lives. Governmental officers taking personal responsibility for their decisions and actions. Figuring out the proper usage of tax funds to keep our tax burden as low as possible. The idea is to find alternative ways to utilize the funding for our County. Not by selling the county out to large government ideology trying to gather state and federal funding only to be subservient to their terms and conditions. For instance, using State or Federal funding that have stipulations causing our main constituents to go against their core values. Rather, choosing to keep true to our constituents by keeping the government out of our personal independent life and not just keeping the norm as we know it today. Challenging new ideas for the use of county funds.

"We The People"

Defend Our Constitution of The United States of America as ratified 1788.

Respectfully,

Jason Gemmer
